ϵ Aurigae, The Interpretation of. *G. P. Kuiper, O. Struve, and B. Strömgren* 570

Binaries, A Spectrographic Observation of the Reflection Effect in Close. *Otto Struve* 198

Boundary-Value Problem of the Theory of Stellar Absorption Lines, The. *Bengt Strömgren* 1

Ca II Triplet in Stellar Spectra, Intensities of the Infrared. *O. C. Wilson and Paul W. Merrill* 162

Calcium Content in Atmospheres of A-Type Stars, The Degree of Variability of. *J. W. Abrams and E. Öpik* 203

Calcium Lines, Regional Study of the Interstellar. *Roscoe F. Sanford* . 136

γ Cassiopeiae, Note on a Possible Effect of the Recent Increase in Brightness of. *W. W. Morgan* 100

δ Cephei, The Contours of $H\gamma$ and $H\delta$ in. *C. J. Krieger* 489

Cepheid Variable Stars, Radial Velocities of. *Alfred H. Joy* 363

Clusters, On the Hydrogen Content of. *G. P. Kuiper* 176

Color Index of the Night Sky, The. *Jessie Rudnick* 212

Color Indices of Reflection Nebulae. *O. C. Collins* 529

Color of the Zodiacal Light, The Photoelectric. *C. T. Elvey and Paul Rudnick* 342

Colors of Extragalactic Nebulae, Photoelectric Magnitudes and. *Joel Stebbins and Albert E. Whitford* 247

Comet Encke, Note on the Spectrum of Periodic. *G. Van Biesbroeck and L. G. Henyey* 622

Comet Skjellerup 1927 K, The Sodium Content of the Head of the Great Daylight. *Arthur Adel, V. M. Slipher, and R. Ladenburg* 345

γ Cygni Nebula, The Spectra of the North America Nebula and of the. *J. L. Greenstein and L. G. Henyey* 620

D. Lines, Analysis of the Intensities of the Interstellar. *O. C. Wilson and Paul W. Merrill* 44

Diffraction Gratings by Knife Edge and by Interferometer, The Testing of. *Henry G. Gale* 437

30 Doradus, The Nuclear Star Cluster in. *Harlow Shapley and John S. Paraskevopoulos* 340

Emission Lines in Late-Type Variables, The Excitation of. *A. D. Thackeray* 499

Encke, Note on the Spectrum of Periodic Comet. *G. Van Biesbroeck and L. G. Henyey* 622
